- Udemy — React.js Complete Course
- Microsoft Certified
- CPN Certificate

LANGUAGES

English — Professional
Yoruba — Native

PROFILE

I build web applications and business websites that are live, functional, and built to last. Recent work includes Dynasty League — a full-stack community platform with real-time leaderboards, an admin panel, Hall of Fame, and tournament bracket system built in Next.js and Supabase — and a 7-page corporate website for Novel Breed Agric Ltd, an agricultural company targeting investors and distributors. I handle everything from the first conversation to the live URL, including design, development, hosting, and deployment. Founder of KunleTech.

WORK EXPERIENCE

IT Operator • *DataGuard NG* · Lagos, Nigeria

Feb 2026 – Present

- Monitor and maintain IT infrastructure, ensuring system uptime and data integrity.
- Handle hardware/software troubleshooting and technical support for all staff.
- Assist in implementing data protection practices and security policy compliance.
- Manage system updates, user accounts, and network maintenance.

Freelance Web Developer & Founder • *KunleTech* · Lagos, Nigeria

2024 – Present

- Built Dynasty League — a full-stack community platform with leaderboards, admin panel, Hall of Fame, and tournament bracket. Stack: Next.js, Supabase, PostgreSQL. Live on Vercel.
- Built Novel Breed Agric Ltd — a 7-page corporate site for an agricultural company targeting investors and distributors. Stack: HTML, CSS, JS. Live on Netlify.
- Delivered branded website proposals, pricing packages, and full deployment for clients.

Web Programming Intern • *Light Tech Programming* · Ogun State, Nigeria

Jul – Sep 2024

- Built and contributed to frontend web projects using HTML, CSS, and JavaScript.
- Adopted version control (Git) and mobile-first responsive design practices.

KEY PROJECTS

Dynasty League — Community Web Platform

[dynasty-league-h2lr.vercel.app](#)

Full-stack platform for a 49-member eFootball community. Real-time leaderboards, click-to-edit admin panel, Hall of Fame with photo uploads, European competition bracket. Next.js · Supabase · PostgreSQL · Vercel.

Novel Breed Agric Ltd — Corporate Website

[stirring-truffle-e749c3.netlify.app](#)

7-page corporate site for a Nigerian agricultural company. Product catalogue, team profiles, governance page, enquiry form — built to win trust with investors and distributors. HTML · CSS · JavaScript · Netlify.

Best Market Place — Fashion E-Commerce Store

[kunle777.github.io/Best-market-placee](#)

Multi-page fashion e-commerce platform featuring product listings across Men, Women, Kids, Accessories and Footwear categories. Includes brand carousel (Nike, Adidas, Zara, H&M), shopping cart, individual product pages, and an admin panel. HTML · CSS · JavaScript.

Fissabillulah — Crowdfunding Platform

Donation platform with Paystack payment integration, dynamic tracking, category filtering, and admin dashboard with Excel/PDF export.
