English — Professional

Yoruba — Native

PROFILE

I build web applications and business websites that are live, functional, and built to last. Recent work includes Dynasty League — a full-stack community platform with real-time leaderboards, an admin panel, Hall of Fame, and tournament bracket system (Next.js + Supabase) — and a 7-page corporate website for Novel Breed Agric Ltd. I handle everything from first conversation to live URL: design, development, hosting, and deployment. Founder of KunleTech.

WORK EXPERIENCE

IT Operator

DataGuard NG · Lagos, Nigeria · May 2026 – Present

- Monitor and maintain IT infrastructure, ensuring system uptime and data integrity.
- Handle hardware/software troubleshooting and provide technical support to all staff.
- Implement data protection practices aligned with organisational security policies.
- Manage system updates, user account administration, and network maintenance.

Freelance Web Developer & Founder

KunleTech · Lagos, Nigeria · 2024 – Present

- Built Dynasty League — full-stack community platform: leaderboards, admin panel, Hall of Fame, tournament bracket. Stack: Next.js, Supabase, PostgreSQL. Live on Vercel.
- Built Novel Breed Agric Ltd — 7-page corporate site for an agricultural company targeting investors and distributors. Stack: HTML, CSS, JS. Live at kunle777.github.io/novel-breed.
- Delivered branded proposals, pricing packages, and full deployment (domain, hosting, SSL) for clients.

Web Programming Intern

Light Tech Programming · Ogun State, Nigeria · Jul – Sep 2024

- Built and contributed to frontend web projects using HTML, CSS, and JavaScript.
- Adopted version control (Git) and mobile-first responsive design best practices.
